

*"I have been doing business with Dennis Costa for many years. When Dennis and Mark approached me with the opportunity to joint their unemployment trust I did not hesitate. Over the past two years my unemployment costs have dropped drastically. I have used Employers Unity for several cases and they have represented me well. I have won every decision that I have appealed this year. That has been a great savings for our organization. I would highly recommend joining the trust. It certainly has been working for us."*

*"As a non profit, our organization is always open to cost containment alternatives. We have had no history of layoffs and are diligent in our record keeping and staff performance but continued to see increases in our State Unemployment Taxes. The Nonprofit Trust offered us an opportunity for significant savings both short and long term. We have also been very pleased with the assistance and performance of their professional staff. The Trust has provided us with an opportunity to both reduce costs, save time and they have been very easy to work with."*

*"Yosemite National Institutes (YNI) has been a client of The Nonprofit Trust for over two years. I appreciated the model of savings that were presented at our initial meeting, and have found that the savings have been considerable, as had been suggested. Whenever I call or email, I receive a very quick response, regardless of the scale or scope of my question. As an HR office of one (me), I need all of the support I can get from our service providers and The Non-Profit Trust has exceeded my expectations where service and support are concerned. Likewise, Employer's Unity, the claims management provider, has represented YNI effectively in terms of claims processing with the various state agencies. I appreciate the detailed and readable status reports that are provided on a quarterly basis. In particular, I appreciate that I receive the reports electronically."*

**Yosemite National Institutes**

*"I have worked with the principals of The Nonprofit Trust for many years and have always found their responsiveness to any issue to be immediate and concluded to my satisfaction. In addition, we have saved significant amounts of money over what we would have been paying in State unemployment taxes. The claims administrator, Employers Unity, has also been very helpful with the claims we have had and in fact, just assisted in getting a claim denied that we would have never expected to win in the past. We trust that our best interests will always be served and that the Trust representatives will always be there when we need them."*
